

INDEPENDENT HOTELS - JUBA

Build a clearer way to run your hotel.

Tembeek is accepting a small number of design-partner hotels for paid founding pilots shaped around real front-desk and management workflows.

THE OUTCOME

Prove a useful operating core.

The proposed first pilot focuses on rooms and occupancy, guest registration, payments and balances, and a traceable daily management report.

01

Assessment first

Map current books, roles, handoffs, infrastructure and management priorities.

02

Bounded paid pilot

Limit the first implementation to a useful workflow and agreed users.

03

Measured adoption

Observe staff use, data quality and management value before expansion.

04

Local conditions

Treat internet, power, training and support capacity as design inputs.

TYPICAL SCOPE

- Hotel operations assessment
- Workflow and implementation plan
- Pilot configuration or build
- Training and early-use support

GOOD FIT WHEN

- The hotel has roughly 20-80 rooms
- Room or payment status is often unclear
- Daily reports arrive late or cannot be traced
- Management wants visibility without chasing

NEXT STEP
