

JUBA - SOUTH SUDAN

Practical systems for the way business works here.

On-site technology, cleaner records and dependable operating systems designed around real connectivity, power and adoption constraints.

THE OUTCOME

Bring order to daily work.

Tembeek begins with the immediate operational pain, installs the smallest useful fix, and expands only after the improvement earns its place.

01

Business records

Sales, expenses, stock, credit, customers, suppliers and reporting.

02

Hotels and guest houses

Technology support, operational assessment and paid systems pilots.

03

Networks and CCTV

Site assessment, Wi-Fi, equipment records, camera health and handoff.

04

Websites and visibility

Fast websites, domain email, maps listings and ongoing care.

TYPICAL SCOPE

- On-site systems check
- Findings and priority fixes
- Setup or implementation
- Training and support

GOOD FIT WHEN

- Paper and spreadsheet records disagree
- Wi-Fi or office technology is unreliable
- Management lacks current reporting
- A business needs a credible online presence

NEXT STEP

Request an on-site systems check in Juba.
